Yahtzee game at which money can be won by high score

European Style Roulette Wheel at which money can be won

Instructions:

IMPORTANT: Go to rules.txt to make the proper changes to the Run.java file. IF THESE ARE NOT

FOLLOWED, IT WILL NOT RUN PROPERLY. Go to reference_rules.html for rules of the game Run

Casino.java to play all the games.

Class List: Casino.java

**Team Responsibilites: **

Edward frontend and backend of blackjack, casino main class, coming up with questions, questions

class **Jerry** frontend and backend of rouletteWheel, fixed some integration things in Yahtzee, casino

main class, coming up with questions, questions class

Joshua frontend and backend of yahztee, casino main class, coming up with questions, questions class

Known Bugs: Datatype issues [fixed], syntax [fixed], spelling [fixed], formating imgs [fixed] , issues importing images due to jpg format not being accepted [fixed], integration problems with Yahtzee money system into casino, a problem with the GUI for Run.java, however it is a GUI problem and outside of the bounds of this class.

Key Learnings: java.awt doesn't accept jpg, needs png, need to IS and HAS relationships between classes
